6. ZigZag Conversion

link

建立n个StringBuffer每个StringBuffer存一行的东西.

```
/*n=numRows
Δ=2n−2    1                          2n−1                       4n−3
Δ=        2                2n−2  2n                    4n−4  4n−2
Δ=        3          2n−3        2n+1          4n−5          .
Δ=        .          .          .          .          .
Δ=        .     n+2             .          3n             .
Δ=        n−1  n+1             3n−3   3n−1             5n−5
Δ=2n−2    n                    3n−2                    5n−4
*/
```
